

For the writeup you should include results for two different morph sequences of your own choosing. At least one sequence should be a morph between two faces. For the second sequence you can try using a different object if you prefer. For each sequence your writeup should show a 5 frame version of the morphing sequence where frame 1 is the first image, frame 5 is the last image and you show three equally spaced intermediate frames.

For the first morph I morphed Bush into Arnold:

For the 2nd morph I morphed two triangles from Piazza:
